

HELIO-PASS HEAT-TRANSFER APPLIANCE

The Helio-Pass (HPAS) heat-transfer appliance is designed for use with coil-in-tank water heating systems. It serves as a closed loop system by circulating solar fluid from the collectors through a tank-integrated coil. Heat from the solar fluid inside the coil is transferred to the domestic water supply.

Features

- Sleek modern, compact design
- Comes with Standard or Pro controller
- "Plug & Play" installation
- Includes expansion tank (5 gal)
- Works with all major coil-in-tank heat exchange brands

Factory-tested
to 300 psi

Helio-Pass Pro Upgrade

The HPAS Pro is an advanced model with a pre-installed Delta-T Pro controller. The advanced controller adds several customizable features as well as in depth energy data storage and monitoring. All of which can be accessed through a dedicated website.

Features

- Remote web-based system monitoring
- Automated service reminders
- Stored energy data (BTU, °F, GPM)
- Adjustable user settings
- BTU/kWh metering
- Vacation mode

TECHNICAL SPECIFICATIONS

Included tank or wall-mount bracket simplifies installation

MODEL	HPAS 048 000	HPAS 048 011
Tank Connect Configuration	Bottom	Bottom
Controller Type	Standard	Pro Ethernet /WiFi
Energy Metering	No	Yes
Maximum Collector Area	320 ft ²	320 ft ²
Voltage	120 VAC	120 VAC
Included Sensors	2 X 10k Ohm	
Warranty	5 year / 3 year electronics
